PROFILE

Developer who builds and ships complete products using an **AI-first workflow**: AI coding agents handle most of the code, and I handle product thinking, architecture, review, testing and deployment. Over the past year this has produced **25+ production-style applications**: SaaS platforms, school ERPs, fintech and accounting systems, e-commerce, a mobile app and WhatsApp automation. Most are live on the web. Given AI tooling and credits, I can take a business requirement from idea to a deployed product quickly. My focus is **Android/mobile apps, SaaS platforms, e-commerce and end-to-end business automation**.

CORE SKILLS

AI Development	AI coding agents (Claude Code and similar), prompt and spec writing, AI-assisted debugging, refactoring, documentation and code review
Frontend	React, TypeScript, Vite, Tailwind CSS, shadcn/ui, responsive dashboards and admin portals
Backend & Data	Supabase (Postgres, Auth, RLS, PL/pgSQL), Laravel, Node.js, REST API design, multi-tenant schemas
Mobile	Cross-platform Android app development (Daraaz Mobile App, Qurtuba App)
Automation	WhatsApp gateway and messaging automation (Evolution API), workflow automation, notifications, reports
DevOps	Git & GitHub, Vercel, GitHub Pages, VPS deployment, CI-style auto-deploy from main
Domains	Education/ERP, accounting & compliance (GST/VAT), fintech, e-commerce, events & live engagement
Also	Graphic design and video editing (past experience)

SELECTED PROJECTS

Campus Solution / Qurtuba Portal: Multi-tenant School & Institution ERP React · TypeScript · Supabase · PL/pgSQL

Public sites, student/teacher dashboards, academics, exams, wallet, library, store, fest management, CMS and super-admin tooling, built on a multi-tenant architecture. Running in production for Qurtuba.

qurtuba.in · campus-solution-three.vercel.app

Qurtuba Accounts: Multi-tenant Donation & Accounting SaaS React · TypeScript · Supabase

Income, expenses, donors, beneficiaries, wallets, audit history and financial reports for multiple organisations. Under active development, with the most commits of any project.

accounts-69662c2e.vercel.app

Compliance Intelligence: Compliance & Double-Entry Accounting Platform TypeScript monorepo · API · SDK

Multi-tenant platform for statutory deadline tracking, double-entry ledgers, GST/VAT/corporate-tax rule evaluation, Benford's-law anomaly checks and filing packages. It exposes an API and SDK that SaaS apps and AI agents can call.

Daraaz: Fintech Operations Platform + Mobile App TypeScript · Web + Android
Web operations platform with a companion mobile app for field and customer use.
daraaz.vercel.app

WhatsApp Gateway & Auto-WhatsApp: Business Messaging Automation Node.js · Evolution API · VPS
Multi-tenant WhatsApp gateway that automates notifications and communication for institutions. Auto-deploys to a VPS from the main branch.

E-Commerce Store React · TypeScript
Online storefront with product catalogue, cart and checkout flow.
e-commerce-ten-gold-71.vercel.app

GCC Accounting & CA-SME Tools React · TypeScript
Accounting tools for SMEs and GCC-region businesses.
gcc-accounting.vercel.app

Quiz Arena Live & Auction Arena: Real-time Event Platforms React · Supabase Realtime
Live quiz and auction systems with host controls, team screens, display views and live scoreboards.
quizarena-eight.vercel.app

EdTech Suite React · TypeScript · Supabase · Laravel
Madrasa Learning Hub (courses, live and one-to-one classes, Laravel API) · **Qurtuba Online School** (teacher discovery) · **Bright Minds Learning** (kids' learning) · **School Star System** (points, levels, leaderboards) · **Shikshak Sathi** (teacher tools, salary/MDM calculators) · **SwiftType Studio** & **PolyglotPlay** (multilingual typing games) · **Dream Analyzer** (AI app).

EXPERIENCE

Freelance / Independent Full-Stack Developer (AI-assisted) · 2025 – Present

- Designed, built and deployed 25+ web, mobile and automation products for schools, non-profits, SMEs and fintech clients.
- Made about 1,000 commits in 2026 alone, keeping a fast iterate-ship-refine cycle with AI coding agents.
- Delivered multi-tenant SaaS architectures with role-based access (super-admin, admin, teacher, student, donor).
- Wrote setup, deployment and contributor documentation to turn prototypes into maintainable products.

Graphic Designer & Video Editor · Organisation · Years
Designed creative assets and edited video content. These visual and communication skills now feed into UI and product work.

EDUCATION

Hudawi degree, Darul Huda Islamic University, Kerala · Year

LANGUAGES

English · Malayalam · Arabic · Hindi/Urdu
