PROFILE

Developer who builds and ships complete products with an **AI-first workflow**. AI coding agents write most of the code. I own the product thinking, architecture, review, testing and deployment. I build **Android apps, multi-tenant SaaS platforms, e-commerce websites and end-to-end business automation**, including the WhatsApp messaging that runs live client systems. With AI tooling and credits, I can turn a business requirement into a working product quickly. I also have 7+ years of work across teaching, graphic design and client-facing web development.

CORE SKILLS

AI Development	AI coding agents (Claude Code and similar), spec and prompt writing, AI-assisted debugging, refactoring, documentation and review
Frontend	React, TypeScript, Vite, Tailwind CSS, shadcn/ui, responsive dashboards and admin portals
Backend & Data	Supabase (PostgreSQL, Auth, Row-Level Security, PL/pgSQL), Node.js, REST APIs, multi-tenant schemas
Mobile	Android apps (offline-first puzzle games and productivity tools)
Automation	WhatsApp gateway (Evolution API), automated notifications, reports and workflows
DevOps	Git & GitHub, Vercel, GitHub Pages, Linux VPS, auto-deploy from main
Tools	MS Excel, Word, PowerPoint · CorelDRAW, Adobe Photoshop

EXPERIENCE

Freelance Full-Stack Developer (AI-assisted) · Independent — 2025 – Present

- Designed, built and deployed multi-tenant SaaS platforms, Android apps and automation systems for schools, organisations and small businesses.
- Made about 1,000 commits in 2026, with a fast build-ship-refine cycle using AI coding agents.
- Built role-based access (super-admin, admin, staff, student, parent) and wrote setup and deployment documentation for each product.

E-Commerce Website Developer (Freelance) · Bigfaction, Bangalore — Apr 2023 – Present

- Develop and maintain e-commerce websites: product catalogues, cart and checkout flows, and storefront design.
- Turn client requirements into responsive online stores and handle updates and improvements.

Graphic Designer · HADIA CSE, Malappuram, Kerala — Nov 2021 – Present

- Book layout design in Urdu and Arabic, and poster designs for digital and print media.
- Editing and proofreading of Urdu books.

Lecturer – Computer Studies & Languages · Darunnoor Education Centre, Mudbidri, Karnataka

- Taught Computer Studies to senior secondary students, and taught Urdu, Arabic, English and Hindi. — Nov 2018 – Nov 2021
- Coordinated students' extra-curricular activities.

SELECTED PROJECTS

Short Budgets: Android Apps Android · offline-first
A portfolio of small, focused Android apps that work offline: **Peepdoku** and **Birdoku** (logic puzzles), **Arrowz** (arrow-maze puzzle), **Pipewise** (pipe-flow puzzle) and **Rollbook** (teacher planner with timetable, attendance register, lesson plans and marks).

Campus Solution / Qurtuba Portal: Multi-tenant School & Institution ERP React · TypeScript · Supabase · PL/pgSQL
Public websites, student and teacher dashboards, academics, exams, a wallet, library, store, CMS and super-admin tooling. One platform serves many institutions.

Qurtuba Accounts: Multi-tenant Donation & Accounting SaaS React · TypeScript · Supabase
Income, expenses, donors, beneficiaries, wallets, audit history and financial reports for multiple organisations.

WhatsApp Gateway & Auto-WhatsApp: Business Messaging Automation Node.js · Evolution API · Linux VPS
Multi-tenant WhatsApp gateway that sends automated notifications and messages for client platforms. Deploys automatically to a VPS from the main branch.

E-Commerce Store React · TypeScript
Online storefront with product catalogue, cart and checkout flow.

Qurtuba Online School: Tutor Marketplace React · TypeScript · Supabase
Online school platform that helps students find and book the right teacher.

Fest Management Platform React · Supabase
React admin console and public website for running festivals and competitions, including events, participants and results.
